

**Globaltherm®**  
a TF Warren Company

Your engineered thermal  
system provider

## Recent Projects

### Ammonia Storage Wever, IA

Design, manufacture, and install insulation on (2) 197' diameter x 97' tall storage tanks.

### Petroleum Storage Geismar, LA

Design, manufacture, and install insulation on (2) 90' diameter x 32' tall storage tanks.

### Fire Protection Chattanooga, TN

Design, manufacture, and install insulation on a 33' diameter x 31' tall storage tank.

### Fire Protection Mebane, NC

Design, manufacture, and install insulation on a 52' diameter x 39' tall storage tank.

### Wastewater Digester Baltimore, MD

Design, manufacture, and install insulation on a 66' diameter x 91' tall storage tank.

## Overview

Globaltherm provides design and manufacturing of both vertical standing seam and horizontal prefabricated tank and vessel insulation systems for both heated and cold storage applications.

Our insulation systems are designed to your specific operational, wind load and extreme hot and cold conditions. Custom designs incorporate a choice of insulation materials and sheathings in various thicknesses, finishes, and colors. All deck panels can be cut and fabricated to match existing tank diameters. Each insulation panel is manufactured specifically to the precise tank height required, providing maximum insulation value.

Globaltherm's tank insulation systems have been used for petrochemical, wastewater, energy, fire protection, and food and beverage products.

## Insulation Capabilities

- Storage tanks
- Spheres
- Vessels
- Drums
- Emissions hot air ductwork
- Digesters
- Precipitators
- Reactors
- Other specialty applications
